

Elementary Education

Education refers to the attainment of knowledge through academic and scholastic efforts. Education includes all that can help one's enlightenment and empowerment. Education gives one the knowledge and skills to work with excellence. It helps in one's all round physical, mental and intellectual growth and development. One learns a great deal about life through education. Education is offered through academic and research institutions, imparted by teachers and trainers. Education equips one to live life meaningfully .It is important that children and youth are educated so they can live productive lives and help in the progress of the society and nation. So education is basic need for life and nation.

Primary Education is also referred to as Elementary Education for the age group of 6 to 14 years old children. These are considered important foundational year for the children, where their basic strengthen, they develop soft skill, understanding, language ability, enhanced creativity etc.

“Education is the passport to the future, for tomorrow belongs to those who prepare for it today.” Malcolm X.
